FREE home delivery on all orders over Rs. 99. The present invention relates to the construction of a motor vehicle. More particularly, the invention relates to a support for a structural member of the body of a motor vehicle. Modern motor vehicles are usually provided with doors, particularly door hinges, which comprise a tubular portion which is internally located and extends across the vehicle body in a substantially horizontal direction. Particularly in the case of door hinges, and this is generally the case, the tubular portion is provided with a corresponding tubular-shaped support for the structure of the vehicle body, also called body support. In general, the body support is manufactured and mounted on the tubular portion of the hinge using the so-called double-leg method. In the prior art, in order to ensure that the body support is correctly positioned with respect to the hinge during the installation of the door hinge, various suitable locating elements are provided on the support to cooperate with mating locating elements formed on the hinge, and even the so-called double-leg method is used. However, the above known and generally used locating elements and methods present disadvantages, such as high production costs, increased production complexity and a difficult mounting of the body support. The aim of the present invention is to provide a support for a structural member of the body of a motor vehicle which can be easily mounted and can reliably locate the structural member with respect to the vehicle body. Within the scope of this aim, an object of the present invention is to provide a support which can be mounted on the tubular portion of the hinge and is able to prevent the body of the vehicle from being damaged by the hinge during the mounting and removal of the door on and from the vehicle. Another object of the present invention is to provide a support which is easily and reliably mounted on the tubular portion of the hinge. Yet another object of the present invention is to provide a support which is able to allow a 82157476af
